## **DETAILED ACTION**

### ***Preliminary Amendments***

1. The Preliminary Amendments filed on December 23, 2005 have been entered. Note that claims 53-59 are newly added claims and are not amended claims as shown in the Preliminary Amendments.

### ***Election/Restrictions***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-45, drawn to a method for detecting and/or for detecting and distinguishing between or among colon cell proliferative disorders in a subject (claims 1-19 and 45) and a method for detecting and/or for detecting and distinguishing between or among colon cell proliferative disorders and healthy tissues in a subject (claims 20-44).

Group II, claims 46-51 and 53-59, drawn to a treated nucleic acid (claims 46, 48, and 49), a nucleic acid (claim 47), an oligomer (claims 50 and 51), and a kit (claims 53-59).

3. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1

Art Unit: 1634

because, under PCT Rule 13.2, they lack the same or corresponding special technical features. For example, the technique feature linking Groups I and II is not special since the nucleic acid recited in claim 47 is not a contribution over the prior art (see Homo sapiens mRNA for KIAA1910 protein, partial cds with database accession No. AB067497 from NCBI database, September 15, 2001 in IDS filed on December 18, 2006). Note that SEQ ID NOs: 1, 304, 305, 420, and 421 are identical (see the specification, page 232).

Sequence Election Requirement is applied to Groups I and II.

Groups I and II read on patentably distinct SEQ ID Numbers. These sequences are patentably distinct because they are structurally unrelated sequences, and a further restriction is applied to Groups I and II. Therefore, applicant must further elect SEQ ID NOs. which are directed to a single invention. Applicant is advised that examination will be restricted to only elected SEQ ID NOs. and should not to be construed as a species election.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center.
